The applicants propose to construct a 30'x42' school house with 2 privies, a driveway, and a seepage pit on 150.64-acre farm. A house and multiple barns, greenhouses, and manure storage facilities are already located on the property. The school house would be accessed using a separate driveway from the current agricultural use. Stormwater for the project would be managed by a seepage pit located adjacent to the existing buildings. The property is located in the Agricultural Zoning District.
